2082
Diploma in Compuer Engineering
Computer Graphics

1. What is Computer Graphics? List out the application of computer graphics. Differentiate between CAD and CAM.
2. Explain different types of touch panels. Different between raster and vector scan display architectures.
3. What is sculling? Write bresenham's line drawing algorithm.
4. Given a triangle with corner coordinates(0,0),(2,0)and (3,2) perform 2D rotation by 90^0 anticlockwise and find out new coordinate. Write DDA line drawing algorithm.
5. Write the matrix notation for shearing. Explain different steps involved in 3D viewing pipeline.
6. Define perspective projection. Differentiate between object space and image space method in hidden surface removal technique.
7. What is parallel projection? Explain constant shading and phong shading model.
8. What are different graphics file formats? Explain different features of graphics packages.

© Ramit Pariyar

9. What do you mean by Virtual Reality? List out its application. Differentiate between semi-immersive and fully immersive virtual reality.

10. Write short notes:

A. CRT Monitors

B. Polygon Tables

C. Browser safe colors.
