2082
Diploma in Compuer Engineering
Operating system

1. What is Operating system. Explain its functions in brief.
2. What is producer consumer problem? Write the solution for producer consumer problem.
3. Define the term paging. Explain different memory allocation strategies.
4. Differentiate between internal and external fragmentation.
5. Explain deadlock in OS. Explain necessary conditions for deadlock in OS.
6. What is deadlock detection? Explain backer's algorithm with example.
7. Explain different file allocation techniques in OS.
8. Define cryptography. Explain different security attacks.
9. Write short notes:

a. Race condition

b. Multi Programming

c. System call.
